

CIVIC ENGAGEMENT INFOGRAPHIC : Volunteering in « L'arche en pays toulousain ».

I am Mathieu Moreau, an MFEE FISE L3 student at N7, and I plan to do my civic engagement project with an association named : « L'arche en pays toulousain ».

Indeed, this is an association which helps disabled persons by taking care of them and suggesting different activities whose some concern sustainable development.

I have chosen this project because it makes social responsability and environment care meet. I would feel really fulfilled and useful by doing this project and helping such an association.

La boutique BIO de l'arche

Notre boutique est ouverte les lundis, Mardis, jeudis et vendredis de 14h30 à 18h30.

I will achieve my project with my teammate Ambroise Peycelon.

Activities planned :

- Market gardening of fields and greenhouses
- Sale of organic vegetables in store and at the market of Blagnac
- Help for running the restaurant « l'étoile du verger »
- Take care of disabled people, ...

All these assignments allow to promote the work done by disabled persons and also to accomplish some activities for the environment.

Le restaurant l'Etoile du Verger

Then, I will also be in contact with clients so it will increase and develop my social skills by encountering and discussing with them and by satisfying their demands. It will allows me to better consider the life priorities by helping these people with their difficulties. And I hope it will help me later in my job to organise and handle assignment with disabled people working in a company because they are not unable to do things.
